

# THE CITY OF TUTTLE

## COMMUNITY DEVELOPMENT

### PIPELINE CONSTRUCTION PERMIT APPLICATION

Section 4-20 of the Tuttle Code of Ordinances requires a building permit from the Community Development Department for all construction activity within the City of Tuttle, including oil and gas pipelines.

The fee for a Pipeline Construction Permit is \$1 per linear foot of pipeline. The maximum price per mile is \$2,000. For example, the permit fee for the construction of 12,000 linear feet of pipe will be \$5,440 (\$4,000 for the first 2 miles and \$1,440 for the fraction of the 3<sup>rd</sup> mile).

An additional \$500 is charged for each street crossing. These fees are in addition to any other fees associated with other required permits that may be required.

A site or plot plan, drawn to scale by a certified land surveyor, must accompany this application showing:

- The proposed path and easements (list book and page of all easements filed with Grady County) for the pipeline;
- All structures associated with the pipeline, including valves;
- The size of each segment of the pipeline;
- All existing public and private easements and rights-of-way crossed and within 100 feet;
- All streets and sidewalks within 100 feet of the pipeline;
- All structures within 100 feet of the pipeline;
- All utilities within 100 feet of the pipeline;
- All public and private water wells within 100 feet of the pipeline;
- All creeks, ponds, lakes, rivers, and other water features within 100 feet of the pipeline; and
- All floodplains within 100 feet of the pipeline.

A separate detail sheet must be submitted for each street crossing. If crossing Oklahoma Department of Transportation right-of-way, then the approved ODOT permits must be submitted to the City of Tuttle prior to starting work.

All temporary or permanent driveway connections will require a separate driveway permit.

The City will also need a copy of the Certificate of Liability Insurance for the pipeline owner and each contractor demonstrating general liability coverage in the amount of \$1,000,000 for each occurrence and \$2,000,000 general aggregate.

Additional information may be required by the Community Development Department depending on the conditions unique to each project.

A complete application packet must be submitted and approved prior to work starting.

Permit applications are expected to take about 10 full business days to review.

An "as-built" site or plot plan must be submitted to the Community Development Department prior to the issuance of a Certificate of Occupancy/Completion. The "as-builts" may be marked-up copies of the site or plot plan submitted with the building permit application. The pipeline may not be used until it has received a Certificate of Occupancy/Completion.

The Building Inspector will conduct periodic inspections. All work completed must meet all applicable local, state, and federal codes & regulations.

Contractor's Name: \_\_\_\_\_

Contractor's Business Address: \_\_\_\_\_

Contractor's Business Phone: (\_\_\_\_) \_\_\_\_\_ Cell Phone: (\_\_\_\_) \_\_\_\_\_

Contractor's Email Address: \_\_\_\_\_

Contractor's Federal EIN: \_\_\_\_\_ Sales Tax ID \_\_\_\_\_
